The Board discussed a variety of items that would be of interest at future meetings. The list of suggestion were:

- This is the first time in 40-50 years that the travel demand models are not accurate in the long-term future. Autonomous and connected vehicles, electric vehicles and such futuristic modes as the hyperloop and air taxis are not taken into account in the current models.
- There are some predictions that within 10 years most travel will be by the use of services like Uber and Lyft using electric vehicles. We have the challenge now of determining how during the next few years to make projections of future transportation.

8. Adjourn

Meeting was adjourned at 7:53 pm

- County staff provide US 380 and Outer Loop map from Transportation Presentation.
