Exceptional Efforts in Disease Investigation and Mitigation (September/October 2019)—

In recent weeks, the Epidemiology department has faced the challenge of a unique disease investigation affecting a variety of stakeholders in the community. Due to the time sensitivity and nature of the disease, Frank and the Epidemiology team have worked tirelessly to ensure all public health evaluations and interventions were performed promptly. Frank supported Dr. Asghar to pick up, prepare, and transport specimens on the weekend to expedite the processing of critical lab work. Frank's self-sacrifice to support the team was invaluable in responding to this event.
